

Jonathan Arundel

What subject(s) did you study during Sixth Form?

During my time at the sixth form at Tudor Grange Academy Kingshurst the subjects I chose to take were Maths, Chemistry, Physics.

What are you studying now and what would like to do next?

Currently, I am studying Computer Science at Newcastle University and I am hoping that my degree will lead me into a career in video game development or software engineering.

What was your experience of Sixth Form like?

My experience of sixth form at Tudor Grange Academy Kingshurst was great. All of my teachers were incredibly supportive and great at teaching their specialist subjects. I found that the staff were very good at communicating changes they intended to make which would impact sixth form students and they would be willing to listen to input from us on how to improve the sixth form from our perspectives.

What was your favourite part of Sixth Form?

Something which I really came to appreciate in sixth form was how much more approachable teachers felt in comparison to when I was in the lower school. Having smaller classes meant that you got to know each of your teachers on a deeper level and form stronger relationships with them.

What advice would you give to someone about to move into Sixth Form?

My advice to current and prospective students is if things get tough don't be afraid to ask for help. The staff at Tudor Grange Academy Kingshurst are all incredibly supportive and they are there to help you get to the next stage in your life, whether that be university or the workplace.
