

Vinnie Stowe

What subject(s) did you study during Sixth Form?

BTEC IT, Business and Maths.

What are you studying now and where, and what would like to do next?

Accounting and Finance at Sheffield Hallam University. Following-on from this, I am hoping to move into work as a Tax Auditor.

What was your experience of Sixth Form like?

The support I was given during my time at Sixth Form was great since they helped me around any problem I had, giving me advice to figure out how I can sort out the situation, or helping me along the way. The teachers made the classes fun and interesting to participate in, using different methods to keep the classes fresh and giving us motivation to put our full effort into the work.

What was your favourite part of Sixth Form?

My favourite part of Sixth Form was the freedom we had to work independently, having independent study periods to revise and finding out what people's goals were for the future and how they aimed to achieve it was all part of a sociable experience with other sixth form students.

What advice would you give to someone about to move into Sixth Form?

Sixth Form enables you to find what you're truly interested in for the future, based upon what you had originally liked when completing GCSEs. When going to Sixth Form, take advantage of the support and advice given to you since it can massively help you when applying for university or looking for a course that suits what you are passionate about. Also, don't forget to be curious. Experiment or question what you learn, you might find exactly what you're looking for!
